

Task 2: Interactive JavaScript Mini Project

Submitted by: Mithilesh Zodape

1. Project Overview

An interactive web application developed using pure JavaScript focusing on dynamic DOM manipulation, event listeners, and user interaction logic.

2. Project Links

3. Key Code Snippet

```
// Dynamic DOM interaction example
document.getElementById('btn').addEventListener('click', () => {
  const input = document.getElementById('userInput').value;
  console.log('User action triggered:', input);
});
```

4. Project Screenshots

Below is the screenshot space for Task 2:
